

After Your Exam

Dear Patient,

DuPage Medical Group would like to thank you for trusting your healthcare to our team of board certified radiologists, highly trained technologists and dedicated support staff. We at DuPage Medical Group take great pride in offering our community some of the most advanced medical imaging facilities in the DuPage area.

Now that you have completed your examination, we understand you are anxious to receive your results. As you leave, our team of sub-specialized radiologists are reviewing your images. Our radiology group has 10 board certified physicians each with an area of specialization. This empowers you to receive the most exact interpretation based on your radiology examination. Although DuPage Medical Group always has at least one radiologist at each primary imaging facility, if the radiologist most suited for your exam is not onsite this moment, our advanced computer network allows your examination to be instantly available to them. In addition, all DuPage Medical Group physicians can view the images from their offices the instant the exam is completed.

When will I get my results? Your referring physician will receive your results within 24-48 hours after your examination completion. Please allow your physician the time to review the report and follow their individual result reporting instructions before contacting their office.

Do I need to take my images with me when I leave for my doctor? DuPage Medical Group physicians can view the images from their offices the instant the exam is completed. Outside physicians would like to view your images along with the report. Many of the physicians will contact us directly when this is necessary. If you would like a copy of your images and report on CD format, please just let us know and they will be made available to you within three business days of your examination completion.

Why may I be called back for further imaging? DuPage Medical Group prides itself on the most complete examination and occasionally, less than 5% of the time, we may ask you to return for additional imaging. The majority of times we request additional imaging is due to motion artifact, technical limitations during your exam or the radiologist may request a slightly different angle to see something that didn't show well during the examination to assure that it is normal. Please, don't be alarmed if we ask you to return.

We hope your experience at DuPage Medical Group was a positive aspect in an otherwise possibly difficult time. We understand having a radiology examination can be very stressful. We attempt to make your examination as comforting as possible, while providing you the highest quality imaging available. In the future if you, your family or your friends need any medical imaging examination, we will always be here for you. We offer Digital Mammography, MRI, PET, CT, Ultrasound, Bone Density and General Radiology examinations. If you have any questions, comments or concerns your voice is very important to us, call us at 630.545.7880.
